

Akshenndra Garg

10 X engineer

I am a 10 X engineer and proficient in 10+ critical areas: data engineering, full-stack development, data science, AI, UI/UX design, product ownership, system architecture, technical strategy, prototype development, go-to-market engineering and sales development . I quickly master new domains and technologies as needed.

TECHNICAL SKILLS

Azure	DataLake, Synapse Analytics, Data Factory, Databricks, ML Flow, Data pipelines, and Apache Spark	Machine Learning	Python, Pytorch, Scikitlearn, Pandas, Numpy, Matplotlib, OpenAI APIs, and R
Databases	MySQL, SQL stored procedures, PostgreSQL	Version control	Git, Azure DevOps
Full stack development	React, CSS, JavaScript, C++, C, Python	Software development	Agile methodologies, MVP & prototype development, code review
Personal projects	AutoFlow Python library and ConvoBuddy language learning webapp and YKI language application	Others	Linux, PowerBI, Kedro, Latex, Vercel, Render, Docker, GCP, Vertex AI, Supabase, Deployment, Netlify, MCP server & AI agents development.

WORK EXPERIENCE

CTO & Co-founder

Zennagents [🔗](#)

02/2025 - 07/2025

Achievements/Tasks

- Developed prospecting & Go-to-Market AI agents and systems which find perfect customers at the right time for B2B businesses.
- Achieved 500 Euros MRR, technical skills of building and deploying teams of agents and agentic workflows.

Founder

YKI AI Coach [🔗](#)

01/2025 - 02/2025

Achievements/Tasks

- Developed AI coach which simulates YKI test and provides instantenous feedback to help students with YKI test.
- Achieved significant user traction with total 4.5k+ active users through word-of-mouth (and counting).
- Average user engagement time: 5.10 minutes per active user during peak usage demonstrating high-quality learning experience.

Data Scientist

Ahlstrom

05/2022 - 11/2024

Helsinki, Finland

Achievements/Tasks

- Recipe 2.0: Achieved **€3.5M paper production cost savings** with **MLflow and Azure Databricks**, aiming for €26M by 2026.
- Developed and deployed automated ML pipeline for **sales forecasting** using Prophet in Azure.
- Engineered **Proof of Concept** R&D dashboards for pulp morphology analysis leveraging SHAP and Power BI.
- Optimized **product profit and loss tracking** with Azure Synapse Analytics enabled **Price Realization Tracker**.
- Developed **Frequency & Volume Pattern Scanner** in Azure Synapse and Python for strategic **product risk identification**.
- Streamlined **Pricing Governance** solutions: **automated data pipeline integration** from Azure Data Lake using SQL and Azure Synapse Analytics.

WORK EXPERIENCE

Data Science Consultant

Freelance

06/2020 - 04/2022

Helsinki, Finland

Achievements/Tasks

- **Dreambroker Oy** - Implemented WCAG-compliant frontend features and advanced **DL application prototyping** for improved video communication.
- **Futusome Oy** - Optimized **backend processes** and crawler configurations in Java and JSON.
- **LYTiQ GmbH** - Achieved an accuracy of 82.5% on **eye gaze classification** using advanced deep learning and image extraction.
- **Gateway group** - Led **predictive analytics** utilizing **ARIMA** and **Holt Winters** in R for enhanced parcel delivery forecasting.

Research Assistant (Deep Learning and Computer Vision)

Aalto University

05/2019 - 11/2019

Espoo, Finland

Achievements/Tasks

- Developed advanced **speech privacy estimation** models using **Random Forests** and **Convolutional Neural Networks**, achieving accuracies of 62.71% and 64.51% respectively.
- Authored a research-based **Master's thesis**, presenting significant study results. [↗](#)

Data Scientist

Ernst and Young [↗](#)

05/2018 - 11/2018

Helsinki, Finland

Achievements/Tasks

- **Pioneered EY's Digital Tax Revolution**: Developed a Python VAT classification tool from scratch, achieving an 80% reduction in tax consultant processing time.
- Enhanced operational **efficiency in EY's core tax operations**, significantly streamlining workload through **ML integration**.

Software Developer (Machine Learning)

Naukri.com [↗](#)

08/2016 - 08/2017

Noida, India

India's leading job portal

Achievements/Tasks

- Developed Naukri.com's chatbot **backend** and **natural language processing engine**.
- Orchestrated and maintained a **testing environment** for the Job Description Parser with MySQL and Python.
- Enhanced chatbot's **entity recognition and user intent analysis** using Stanford Named Entity Recognition, and improved parser accuracy by 15%.

Research Assistant

University of Paderborn, Germany [↗](#)

01/2016 - 06/2016

Paderborn, Germany

Achievements/Tasks

- Engineered **AutoFlow, Python library** for automated data preprocessing, feature transformation, model selection, hyperparameter optimization, and ensemble modeling.
- Delivered over **80% accuracy** on standard datasets with AutoFlow, showcasing its efficacy with **minimal user input**.
- Authored a **Bachelor's thesis** with novel findings, underpinned by extensive research facilitated by AutoFlow. [↗](#)

EDUCATION

Master of Science (Technology) Machine Learning, Data Science & Artificial Intelligence

Aalto University, Finland

09/2017 - 12/2022

Helsinki, Finland

Bachelor's of Technology in Information Technology

Indian Institute of Information Technology, India

08/2012 - 09/2016

Allahabad, India
